

**FOR IMMEDIATE RELEASE****GAMUDA-OWNED DT INFRASTRUCTURE WINS METRONET HIGH-CAPACITY SIGNALLING PROJECT IN AUSTRALIA**

*The world's largest signalling project by route length.*

**18 July 2024, Petaling Jaya:** Engineering and construction giant Gamuda Berhad, through its wholly-owned sub-subsidiary in Australia, DT Infrastructure, has been awarded an AUD\$1.6 billion (RM5.0 billion) contract for the Perth, Western Australia High-Capacity Signalling Project.

This project, which is the world's largest signalling project by route length, reinforces Gamuda's strategic position in Australia and showcases its capability to deliver large-scale, transformative infrastructure solutions.

Awarded by the Public Transport Authority (PTA) of Western Australia, the 46:54 joint venture between DT Infrastructure Pty Ltd and ALSTOM Transport Australia Pty Limited contract consists of the design, supply, installation, testing, commissioning and maintenance of a new Automatic Train Control System to replace the existing PTA signalling and train control systems.

Upon completion, the project will enable 40% increase in network capacity, energy saving benefits, leading cybersecurity and future proofing of network for growth with minimum disruption to commuters.

DT Infrastructure is part of the Gamuda Group of Companies, established in June 2023 following Gamuda's acquisition of Downer EDI's Australian transport projects business. The company brings extensive expertise across multiple sectors, such as defence, transport (rail, roads and bridges), and infrastructure (power, renewables and water). Specialising in rail systems and digital engineering, as well as intelligent transport solutions, DT Infrastructure has almost 50 project wins to date, reflecting its commitment to innovative technology and strong client relationships.

### **About Gamuda Berhad**

Founded in 1976, Gamuda Berhad has grown into a regional engineering, property, and infrastructure leader. We're known for our innovative solutions and commitment to excellence, with a presence across Malaysia, Taiwan, Singapore, Australia, the United Kingdom, India, Vietnam, Bahrain, and Qatar.

Our digital transformation journey began five decades ago, exemplified by our early adoption during the Stormwater Management and Road Tunnel (SMART) project. Renowned for pioneering iconic solutions like the SMART and introducing cutting-edge tunnel boring technologies, such as the Variable Density Tunnel Boring Machine (VD TBM) and the Autonomous Tunnel Boring Machine (A-TBM), we continue to shape the infrastructure landscape with our vision: "Leading the region in breakthrough solutions."
