SURVEY METHODOLOGY

[II Research](#) seeks the opinions of senior executives in corporations, fund management groups, and securities firms to develop rankings and evaluations of individual teams and firms. These rankings measure qualitative performance based on voters' expressed opinions on research, sales, trading, investment banking, and investor relations.

A total of 5,894 investors, portfolio managers and analysts from 1,388 voter firms participated in the survey, nominating a total of 1,669 companies and 2,595 individuals across 18 sectors. This included 4,943 buy-side professionals from 1,232 buy-side companies with an estimated US \$2 trillion in Asia (ex-Japan) equities and 951 sell-side analysts from 156 companies.

Voters rate the companies according to each characteristic or performance attribute. Their votes are then weighted by the rank they have assigned each company and aggregated to produce buy-side, sell-side and combined buy- and sell-side rankings for each sector.
